Closure Plan for Class V Injection Well – Large Capacity Cesspool

Macomb Reservation State Park, 201 Campsite Road, Schuyler Falls, NY 12985
#1 Comfort Station (cesspool #8)

Background & Intent: It is the intent to close the existing cesspool/seepage (cesspool#8) pits adjacent to comfort station #1 (see attached Map). EPA/DEC is requiring us to close the cesspool/seepage pits for each facility listed above.

- A) **Location plan and site plan of the closures:** – see attached.
- B) **Description of Business:** Camping/campsites/RV Park for the public. SIC code is 7033.
- C) **Description of Fluids injected:** Sanitary Human Waste – There are no drains of any kind located near chemicals / or where Chemical wastes are stored delivered or generated.
- D) **Connection between drains and Injection wells:** The entire well and drain line will be removed.
- E) **Description of cesspool closures:** Site will be backfilled with clean inert Sand and stone.
- F) **Contaminant Removal:** All waste/contaminated soils will be removed from in and around the cesspool until visibly clean soil is reached. Removal will be by excavation.
- G) **Onsite storage:** Storage will be in a tarp covered dump truck until disposal.
- H & I) **Waste Characterization: Refer to section II which discusses Well Specific Sampling Requirements Section A. 1.) Large Capacity cesspools that have received only sanitary waste. Requirement as follows: “Large capacity” means serves or designed to serve 20 or more people per day. The cesspool must be pumped out and the wastes must be disposed of properly by a licensed hauler. Excavation, end-point sampling and analysis are typically not required.” The waste/fluids that entered the Class V well previously were untreated sanitary waste containing human excreta.** Thus no testing will be conducted.
- J) **Backfill:** The site will be backfilled with clean inert Sand and Stone.
- K) **Final Report:** final Report will be sent to:
Nicole Kraft Chief
